Conference picture x

Preface xi

Bibliography of Haakon Waadeland xii

Mathematical publications of Haakon Waadeland xix

Plenary talks

R.W. Barnard
On applications of hypergeometric functions 1

B.C. Berndt, H.H. Chan, S.-S. Huang, S.-Y. Kang, J. Sohn and S.H. Son
The Rogers–Ramanujan continued fraction 9

A. Cuyt
How well can the concept of Padé approximant be generalized to the multivariate case? 25

W.B. Jones and O. Njåstad
Orthogonal Laurent polynomials and strong moment theory: a survey 51

T.H. MacGregor
Fractional Cauchy transforms 93

F. Marcellán and E. Prianes
Perturbations of Laguerre–Hahn linear functionals 109

Shorter talks

G.A. Baker, Jr.
Algebraic approximants and the numerical solution of parabolic equations 129

L. Baratchart, H. Stahl and F. Wielonsky
Non-uniqueness of rational best approximants 141

A.F. Beardon
The Klein, Hilbert and Poincaré metrics of a domain 155

E. Berriochoa and A. Cachafeiro
A family of Sobolev orthogonal polynomials on the unit circle 163

C.M. Bonan-Hamada and W.B. Jones
Para-orthogonal Laurent polynomials and the strong Stieltjes moment problem 175

C.F. Bracciali, J.H. McCabe and A. Sri Ranga
On a symmetry in strong distributions 187

A. Bultheel, P. González-Vera, E. Hendriksen and O. Njåstad
A density problem for orthogonal rational functions 199

A. Cuyt, K. Driver, J. Tan and B. Verdonk
A finite sum representation of the Appell series F_1 (a, b, b'; c; x, y) 213

M.G. de Bruin and A. Sharma
On a Schoenberg-type conjecture 221

C. Díaz-Mendoza, P. González-Vera and R. Orive
Two-point Padé-type approximation to the Cauchy transform of certain strong distributions 229

J. Dziok
Classes of functions defined by certain differential–integral operators 245

M. Essén, D. Shea and C. Stanton
Best constant inequalities for conjugate functions 257

A.F. Infante and G.L. Lagomasino
Overconvergence of subsequences of rows of Padé approximants with gaps 265

F.W. Gehring and K. Hag
Hyperbolic geometry and disks 275

J. Gilewicz and M. Pindor
Padé approximants and noise: rational functions 285

J. Gill
A natural continuous interpolating structure for continued fractions 299

A.Z. Grinshpan
Remarks on the Grunsky norm and *p*th root transformation 311

P.E. Gustafson and B.A. Hagler
Gaussian quadrature rules and numerical examples for strong extensions of mass distribution functions 317

S. Kanas and A. Wisniowska
Conic regions and k-uniform convexity 327

J.G. Krzyż and M. Nowak
Harmonic automorphisms of the unit disk 337

K. Kuchmins'ka
Some properties of two-dimensional continued fractions 347

L.J. Lange
Convergence regions with bounded convex complements for continued fractions $K(1/b_n)$ 355

Z. Lewandowski and J. Szyna
The Landau problem for bounded nonvanishing functions 367

X. Li
Regularity of orthogonal rational functions with poles on the unit circle 371

W. Ma and D. Minda
Two-point distortion for univalent functions 385

J.J. Moreno-Balcázar and A. Martínez-Finkelshtein
Analytic properties of nondiagonal Jacobi–Sobolev orthogonal polynomials 393

P. Moussa, A. Cassa and S. Marmi
Continued fractions and Brjuno functions 403

P. Orlik
Hypergeometric integrals and arrangements 417

D. Partyka and K.-I. Sakan
Quasiconformality of harmonic extensions 425

V. Petersen
On measures in frequency analysis 437

R.J. Rensaa
On omitted tuples for univalent functions 445

D.E. Roberts
On a representation of vector continued fractions 453

W.J. Thron
Improved truncation error bounds for limit periodic continued fractions with additional assumptions on its elements 467
